Dear Henry:

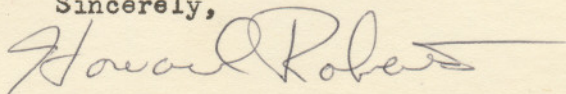

I'm sorry to be so long getting around to this, but I guess it's better late than never.

You'll probably recall from the seminar, that there was a lot of interest expressed in some kind of continued communications. Some have mentioned private lessons, and this of course is impractical for me. Others have mentioned mailing materials back and forth -- also the idea of lessons on tape has come up more and more frequently.

After giving this a lot of thought, I think the tape thing might work, as a sort of private lesson for the seminar guys who want to continue their studies.

The exact details for doing this would have to be worked out on an individual basis. So if you are interested in persuing this idea, please call me person to person at 213-769-4144.

Sincerely,

P.S. Oh by the way, in order to make this thing come off, I'll have to work out an organized time slot in my regular schedule, and the longer it takes me to do this, the more difficult the project will be. So in the interest of not getting bogged down, if you want to do this, let me know right away.
